Driving Quality

## Auto-Step No wiring required!

- No wiring
- Fast and easy to install
- No ground clearance issues
- Lightweight aluminum body
- Service free
- Competitively priced
- Full sliding door width

Auto-step is an automatically deployed side-step that requires no power. Auto-step operates with the mechanical movement of the sliding door and requires no assistance from the user. The step is deployed gently into position, allowing easy access into and out of the vehicle; simply close the sliding door and the step returns to its stowed position.

Unlike other steps, Auto-step requires no servicing or maintenance. It's the perfect solution when chassis configurations make it impossible to fit steps under door sills.

## Auto-Step

### Specification

- Safe Working Load:** \* 160KG
- Step Depth:** \* 260mm (nominal). Length dependent upon base vehicle.
- Assembled Weight:** \* Approx 5KG
- Body Construction:**
- \* Aluminium alloy 6005 T6 extrusions (heat treated to T6 specification). Anodised finish with Nylon 66 finishing trims.
  - \* Pivot casings formed from aluminium alloy LM25 heat treated TF.
  - \* Acetal Polymer door opener moulding.
  - \* Pivot bushes are self-aligning, maintenance free spherical bearings formed from high performance polymers.
  - \* Spring loaded return mechanism with oil filled motion dampers.
  - \* Additional metal fabrications in 304 grade stainless steel.
  - \* Anti-slip grit material applied to step tread surface.
  - \* Monobolt mounted on to the sill of the vehicle.
- Warranty:** \* One year return to base warranty.
